1. **Introduction** 2. **Background** 3. **Methodology**

The first step in the process of the research is to identify the research problem. This is followed by the selection of the research method and the collection of data.

The next step is to identify the research problem. This is followed by the selection of the research method and the collection of data.

The next step is to identify the research problem. This is followed by the selection of the research method and the collection of data.

1. Identification of the research problem
2. Selection of the research method
3. Collection of data
4. Analysis of data
5. Interpretation of results

The next step is to identify the research problem. This is followed by the selection of the research method and the collection of data.
